## Big data on Tactical Farming conference agenda

Farm data will be in the spotlight at the Tactical Farming conference in Calgary on Feb. 10-11.

The conference will have presentations on “climate smart” precision ag (Raj Khosla), on-farm research data (Peter Kyveryga), variable-rate nitrogen for canola (Alan Moulin), using aerial imagery (Patrick Reeg), and transforming data into knowledge (Farming Smarter). The conference is being put on by six farmer-run Alberta research groups.

The conference will be held at the Deerfoot Inn & Casinos on Feb. 10-11. The registration fee is \$250 with two lunches and one breakfast included.

For more information and to register, go to [tacticalfarming.ca](http://tacticalfarming.ca).
