Farming Smarter: Build a biobed to manage rinsate

April 9, 2020

[YouTube Link](#)

Dr. Claudia Sheedy and Farming Smarter want you to build a biobed to manage pesticide rinsates on your farm. Farming Smarter built a working biobed for its farm and often includes it in tours. They also built a biobed trailer that can travel southern Alberta for people to copy or use a template for their farm. While building its biobed, Farming Smarter created a parts list available to anyone.
