

# Farming Smarter: Cutworms and Carnage: Identify and Deal With Cutworms on Your Farm

Dr. Kevin Floate talks about cutworms in Alberta at Farming Smarter's Lethbridge conference in 2017. He talks about the types of cutworms in Alberta and the crop damage they do. He emphasizes that the Alberta government has an online reporting site to gather info about cutworm populations, types and crop preferences and encourages farmers to use it.

You can find that by clicking [here](#).

He also asked that land managers/farmers access the online guide to cutworms available as a PDF available [here](#).
